

Santorini Island

Europe >

Fragrant lemons scent the air along winding paths that lead to hills filled with volcanic rock. At the top of a cliff, a maze of white-washed lanes meanders beneath canopies of bougainvillea, past terraced houses painted pale shades of cream and yellow. The sun's fading light falls upon the enchanting villages of Santorini, illuminating domed churches and simple colonnades with dazzling radiance. This shimmering pearl in the Cycladic archipelago is one of the most stunning destinations on earth. Gracefully, the island curves around a caldera, merging the tranquility of the Aegean Sea with a brilliant, rugged landscape.
